Every market gardener and florist should have a copy of Burpee's Annual Garden Book for 1949 because it is the best and most reliable retail seed catalog ever issued. It fully describes the best varieties of Vegetables, Flowers and Bulbs. One of these books has been sent to you; keep it on your desk for reference. If you want another copy for yourself, friend or neighbor, let us know, and if you have any friends who grow for market, send us their names and addresses so that we may also mail them a copy of Burpee's Blue List. *Important:* the Blue List is for the exclusive use of the market gardener, trucker, and florist, so please do not let it get into the hands of retail buyers.

Burpee Hybrid Cucumber

60 days—True first-generation hybrid, white-spine slicer, combining marketable qualities with high resistance to diseases. The extremely vigorous and long-lived vines bear an abundance of well-formed, handsome fruits, 8 in. and more long, 2½ in. wide at marketable stage, square at both ends, medium seed cavity and crispy white flesh of fine quality. Growers in the South acclaim Burpee Hybrid because it requires less rigid schedule of spraying to combat downy mildew and because of its high yield. In the North, growers prefer Burpee Hybrid because it produces a good crop early as well as late when prices are high and most other varieties succumb to mosaic and mildew.

August 4, 1948

"This past spring I purchased 100 pounds of your Hybrid Cucumber seed. To date, these cucumbers have out-yielded and out-lasting any variety that I have grown heretofore. Because of their outstanding performance, I should like to place my order for 100 pounds of Hybrid Cucumber seed from this year's crop."

October 1, 1948

"I am still picking as of today from the last planting, and they are showing about 85% fancy."

BURPEE'S HYBRID TOMATOES

1131 Burpee's Big Boy

78 days—New, true first-generation (F₁) hybrid, at its peak of production in midseason when many standard varieties decline in yield and size of fruit. Unlike other large varieties, Big Boy Tomatoes are perfectly smooth, deep globe to deep oblate in shape, very firm, extra large, average 10 ozs., some weigh 1 lb. or more. Scarlet-red skin, thick walls, bright red, meaty flesh of fine flavor and excellent quality. Plants are large, extremely vigorous and heavy producers. Readily salable in market and roadside stands. $\frac{1}{2}$ oz. \$18.00; oz. \$35.00

1133 Burpeeana Early Hybrid

58 days—Distinctly different, extra early, true first-generation (F₁) hybrid tomato created at Burpee's Fordhook Farms, where it produced the highest early yield of all varieties in our testing grounds. Fruits are of an attractive, deep globular shape, medium size, smooth, firm, rich scarlet, average 5 ozs. in weight, and are borne profusely in clusters of from 5 to 8. Quality is excellent; flavor is mild. Plants are of spreading habit with plenty of foliage to afford protection from sun-scald. Profitable tomato for early market.

$\frac{1}{2}$ oz. \$16.00; oz. \$27.50

1121 Fordhook Hybrid

60 days—An early, highly productive, long-bearing, true first-generation (F₁) hybrid, noted for its big yield and uniformly shaped, smooth fruits of medium size, average 6 ozs., oblate to globular in shape, and borne in large clusters. Skin colors evenly to a clear bright red all over; flesh firm and mildly acid to sweet in flavor. You can get new production records with Fordhook Hybrid, without sacrificing fruit size, by providing proper fertilization and adequate moisture supply. Fordhook is a dependable hybrid and especially suited for early market and shipping. $\frac{1}{2}$ oz. \$16.00; oz. \$27.50

1132 Burpee Hybrid

70 days—Early-midseason, all-purpose, true first-generation (F₁) hybrid which outyields Rutgers or Marglobe in fruit number by an average of 20%. Fruits are medium to large, average 8 ozs. in weight, deep globular in shape, smooth, scarlet-red, flesh meaty, firm; cell walls very thick, of outstanding quality and rich flavor. A valuable tomato for the market grower, canning, and distant shipping.

$\frac{1}{2}$ oz. \$16.50; oz. \$28.50;
 $\frac{1}{4}$ lb. \$85.00; lb. \$325.00

1135 Clinton Hybrid

75 days—Midseason, very productive, true first-generation (F₁) hybrid developed especially for the Middlewest and well adapted to other regions. Plants are large, vigorous, with dense foliage which protects the fruit from sun-scald. Will outyield most open-pollinated varieties of the same class. Fruits are large, weigh about 8 ozs. or more, deep red, globular to oblate in shape; firm flesh of excellent quality. Recommended for market, canning, and long distance shipping.

$\frac{1}{2}$ oz. \$16.50; oz. \$28.50;
 $\frac{1}{4}$ lb. \$85.00; lb. \$325.00

Burpee's Early Flowering SWEET PEAS

Varieties are arranged in each color class from deep to light shades

Burpee's Early Flowering Sweet Peas come into bloom outdoors before the summer heat arrives—3 to 4 weeks earlier than the Giant (Spencer) varieties offered on pages 54 to 58. They are valuable for winter flowering under glass, also especially adapted for growing in frost-free sections and for earliest blooms outdoors in the North. Sweet Peas do best in cool weather. If seed was not sown in the fall, sow as early in the spring as the ground can be prepared. They prefer an open, sunny location, and deep, rich soil which must be well drained.
